Description:

FIBERWDM's RSPD-10GC100-XX is a very compact 10Gb/s optical transceiver module for serial optical communication applications at 10Gb/s. The RSPD-10GC100-XX converts a 10Gb/s serial electrical data stream to 10Gb/s optical output signal and a 10Gb/s optical input signal to 10Gb/s serial electrical data streams. The high speed 10Gb/s electrical interface is fully compliant with SFI specification.

The high performance 1470 ~ 1550nm CWDM EML transmitter and high sensitivity APD receiver provide superior performance for Ethernet applications at up to 100km links.

The SFP+ Module compliants with SFF-8431, SFF-8432 and IEEE 802.3ae 10GBASE. Digital diagnostics functions are available via a 2-wire serial interface, as specified in SFF-8472.

The fully SFP compliant form factor provides hot pluggability, easy optical port upgrades and low EMI emission.
